ASHTAROTH HOUSE OF THE UNHOLY

SYNOPSIS

A young couple has just relocated to a new town. When the girlfriend calls to say she has to stay at work until morning, the unsuspecting boyfriend is left alone on the first night in their new home. The amusement fades as weird and terrifying events unfold throughout the evening.

THE FILM

While living on island and cut off by the pandemic, one can only spend so many hours re-watching old school horror films like *Near Dark*, *The Exorcist*, *An American Werewolf in London* and *Poltergeist*. This film is inspired by the low budget first person experience, by the people who move to new places with new hopes and dreams only to be met by disappointment, isolation and sometimes... terror.
